

TEGO® Dispers 673 – New Superior Dispersing Agent for Solventborne Plastic Coatings

June 30, 2015

TEGO® Dispers 673 is specifically designed for high quality solventborne plastic coatings. Its effectiveness with carbon black pigments enables high jetness/blackness especially in medium–solid coatings. This qualifies the product particularly for computing, communication, and consumer electronics as well as car interior coatings.

Besides its high effectiveness with carbon black pigments, TEGO® Dispers 673 provides excellent color stability and works well with various organic pigments. It is compatible with many binder systems. Additionally, TEGO® Dispers 673 is easily processed. It leads to a strong viscosity reduction and stable viscosity in the pigment paste, while not influencing other important properties such as adhesion or chemical, sunblock, and UV resistance.

Company information

Evonik, the creative industrial group from Germany, is one of the world leaders in specialty chemicals. Profitable growth and a sustained increase in the value of the company form the heart of Evonik's corporate strategy. Its activities focus on the key megatrends health, nutrition, resource efficiency and globalization. Evonik benefits specifically from its innovative prowess and integrated technology platforms. Evonik is active in over 100 countries around the world. In fiscal 2014 more than 33,000 employees generated sales of around €12.9 billion and an operating profit (adjusted EBITDA) of about €1.9 billion.

Evonik Industries has been producing specialty chemical products in the Greater China region (Mainland China, Hong Kong and Taiwan) since the late 1970's; with wide-ranging trading relations already in place prior to this in the region. Evonik regards Greater China as one of the driving forces of the global economy and we consequently endeavour to grow our business in the region. The company now has around 3,000 employees in the Greater China region, the regional sales reached over €1.1 billion in 2014.
