

TEGO® Dispers 670, Wetting and Dispersing at its Highest Level

TEGO® Dispers 670 is a high performance wetting and dispersing additive for solventborne applications. It allows the formulation of organic, inorganic or carbon black pigment dispersions for high end applications such as automotive coatings, industrial 2-pack PU systems or enamels as well as jet inks requiring superior transparency in combination with high gloss.

Effective reduction of mill-base viscosities and therefore high pigment loadings with excellent pigment stabilization are achieved as well. Extremely low yield points have been measured with pigment dispersions based on TEGO® Dispers 670 in combination with superior color strength development. Productivity can be optimized due to outstanding pigment wetting and thus shortened grinding times.

Chemical composition

40 % solution of a high molecular weight polymer with pigment affinic groups in MPA/dibasic ester (mixing ratio 1:1).

About Evonik

Evonik Industries is the creative industrial group from Germany which operates in three business areas: Chemicals, Energy and Real Estate. Evonik is a global leader in specialty chemicals, an expert in power generation from hard coal and renewable energies, and one of the largest private residential real estate companies in Germany. Our strengths are creativity, specialization, continuous self-renewal, and reliability. Evonik is active in over 100 countries around the world. In its fiscal year 2008 about 41,000 employees generated sales of about €15.9 billion and an operating profit (EBITDA) of about €2.2 billion.

Evonik Industries has been producing specialty chemical products in China since the early 1990's, with wide-ranging trading relations already in place prior to this. The Group now has a total of 20 companies and 16 production sites in the region. In fiscal year 2008, 4,000 employees generated sales of over €820 million. Evonik regards China as one of the driving forces of the global economy, and we consequently intend to increase our business in Greater China to around €2 billion in the medium term.
